

Proposed Changes to previously approved plan.

- 1) Addition of 14' breezeway in the back of the new addition to accommodate for gas/sewer easement. The breezeway will have pavestone walking area, 1920 style store front frontage on both sides and a water feature.
- 2) Change current South facing 1950 industrial window style to the warmer and **original** 1920 double hung style windows.
- 3) Reveal public vote for South wall finish. Original approved with new coat of flat cottage white paint vs rough brick or German smear.
- 4) Discuss concept of "softening" the approved second floor area, which will be revealed in May HLC meeting.
