SUMMARY	<p>Over the past several months, the Council has taken numerous actions associated with the now ongoing TxDOT project to improve IH-10 between SH-46 and Scenic Loop Road. TxDOT has advised that they are now in design of a similar project to make improvements to IH-10 between Scenic Loop Road and the Bexar County Line.</p> <p>Although we have not been made aware of the full scope of these proposed improvements, we have been told that we have existing natural gas utility lines in the IH-10 ROW that are in conflict with the work. As on previous projects, it is within TxDOT's jurisdiction to require that we relocate our utility lines as necessary. TxDOT desires that we joint-bid our natural gas utility relocation work with their roadway improvements to be managed by TxDOT as part of their contract. As on other IH-10 work, we have been advised that our financial participation in design and construction in Federal ROW is completely reimbursable.</p> <p>The consulting firm of Halff TriTex, Inc. was selected for this work based on their qualifications and their associations with TxDOT on the design of the roadway work. We have negotiated a contract with Halff TriTex for the necessary work at a fee of \$77,900.00.</p> <p>Staff recommend the Council authorize the City Manager to execute this professional services contract with Halff TriTex, Inc. as described above.</p>
