

## WORK CONTRACT

3/7/2019

CITY OF BOERNE  
402 E. BLANCO  
BOERNE, TX 78006

Attn: Victor Longoria  
Ph: 830-248-1622  
Fax: 830-331-9100  
Cell: 210-865-9722  
[vlongoria@boerne-tx.gov](mailto:vlongoria@boerne-tx.gov)

We propose to furnish all materials, labor, and equipment to complete the following project:  
**Re: Various Locations**

### CRACKSEALING - ROUT AND SEAL

1. Each crack to be routed.
  2. Routed cracks will be blown clean using an air compressor.
  3. Cracks will be sealed with Crafco brand Polyflex Hot Pour sealant material.
  4. Crack seal material will be squeegeed in a narrow band to insure a proper seal of crack
  5. Contractor shall provide his/her own traffic control while all work is being performed
- 20,000 lbs @ \$2.25 / lb      \$45,000.00

We will not be responsible for damages to underground utilities unless clearly marked by owner or authorized agent. All materials to be as specified. All work to be completed in a substantial workmanlike manner according to standard practices. Any deviation or alteration from above specification involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate.

Good afternoon Roger, thank you for your quote however, I need something more formal in order to present it to the City Council. A quote on letterhead and detailing what you can do will help me, thanks.

Victor

Good morning Roger, I would like to know if your interested in submitting a quote to us about doing crack sealing in our city? If you are, I would need a quote showing how many pounds (LBS), of crack sealing you could do on our city streets for \$45,000.00. We have a limited budget so we can not go over \$45,000.00, so the pounds you quote us will ensure we get the most for our money. Please be advised that the contract between us should include #1-that each crack is to be routed, #2-routed cracks will be blown clean using an air compressor, #3-cracks shall be sealed with a Crafcro brand Polyflex Hot Pour sealant material, #4-crack seal material shall be squeegeed in a narrow band to insure a proper seal of crack and #5-contractor shall provide their own traffic control while all work is being preformed.

If you have any questions, please feel free to contact me, thanks.
